## Introduction

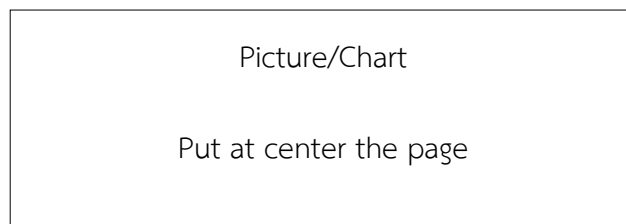

Contents contain using academic language that is correct according to academic principles and clearly convey the importance of the research problem. Content is properly referenced according to the citation system and there is a sequence of stories or content that is connected in a logical and consequential order. In-text Citations inserted in the content use the APA (American Psychological Association citation style) system, which is to refer to documents at the front or back of the text. It can be used in both Thai and/or English. However, if the document citation is in English, specify only the author's last name separated by a comma (,), year of publication (AD), and page number according to the following format: Author/(Year of Publication : page) or (Author./ Year of Publication : page) such as Supsin (2018 : 18) or (Brown, 1997 : 18-22) etc. (by using font TH SarabunPSK size 16)

## Content

The results of the study should present according to the study sequence. Results should be classified into categories and related to the study objectives by describing the story or display additional details with illustrations, tables, graphs, or charts as appropriate. Findings that create new knowledge from the research are presented. Suggestion, new opinions for valuable guidance and substances that can be applied to benefit. Showing additional details with mind maps or diagrams and narrating the story as appropriate are needed.
